Order of Contents

Using the Index

Subject Index

Author Index

Readers are reminded that the index uses natural language and for effective use some exploration of synonyms and alternative English/American spelling may be required.

Using the Index

This index has been designed to allow rapid search without any need to refer to a long classification code. It will be seen to have some similarities with the common KWIC (Keyword in context) type of computer index, although it departs from the KWIC layout by placing the indexed word in the conventional left hand position. By means of words chosen from the title or the body of the abstract, each item is indexed an average of 7 times. As all of these words have been selected by the editors, or other specialists, and are not automatically chosen by machine, the number of redundant entries is kept to a minimum. However, the index does employ the spelling and terminology of the original abstracts and their titles, so that for best results when searching the index it is important to anticipate alternative (English/US) spelling and the existence of many approximate syonynms (eg power:energy, or transport:communications).

The SUBJECT INDEX contains three types of entry which are printed in various rearrangements to give an average of seven entries per abstract.

1) Foreign titles. They are here indexed only by the first significant word, and the entire title is printed, even where this occupies two or more lines. All the lines after the first are inset, and the number of the abstract ONLY appears on the last line. e.g.

NUEVAS FORMAS DE INESTABILIDAD EXTERNA EN AMERICA LATINA: FUENTES, MEC
ANISMOS DE TRANSMISION Y POLITICAS.= 82V/1841

2) English titles. These are either the original title of an article in English, or the translation of the foreign title. Titles may be recognised by the fact that they end with a full stop (period) and an equals sign. e.g.

SILENT SLOPES: ENVIRONMENTAL ECONOMICS IN THE NEPALESE HILLS.= 82V/2092

or alternatively:

ENVIRONMENTAL ECONOMICS IN THE NEPALESE HILLS.= SILENT SLOPES 82V/2092

3) Groups of keywords. (usually 2-8 in number) A keyword is a single word or group of words taken from the text of the abstract to supplement the title. In cases where the title is fully informative no keywords are added. Where there are two or more words forming a composite keyword they are hyphenated, and each keyword is separated from the next by a space. The end of a group of keywords is marked by an equals sign along. e.g.

MIGRATION RANK-SIZE-DISTRIBUTION ECONOMIC-DEVELOPMENT MEXICO= 82V/2695

or alternatively:

RANK-SIZE-DISTRIBUTION ECONOMIC-DEVELOPMENT MEXICO= MIGRATION 82V/2695
ECONOMIC-DEVELOPMENT MEXICO= MIGRATION RANK-SIZE-DISTRIBUTION 82V/2695
MEXICO= MIGRATION RANK-SIZE-DISTRIBUTION ECONOMIC-DEVELOPMENT 82V/2695

The title entries are indexed under every significant word in the title. Each significant word will be found in its appropriate alphabetical position and is followed by as much of the title as can be printed on one line. In very many cases the whole title will fit on one line. e.g.

POVERTY, INEQUALITY AND THE PROBLEM OF NUTRITION IN BANGALADESH.=	82V/2789
INEQUALITY AND THE PROBLEM OF NUTRITION IN BANGALADESH.= POVERTY,	82V/2789
NUTRITION IN BANGALADESH.= POVERTY, INEQUALITY AND THE PROBLEM OF	82V/2789
BANGALADESH.= POVERTY, INEQUALITY AND THE PROBLEM OF NUTRITION IN	82V/2789

Where the title is too long the line is filled with what will fit in:

INDUSTRIAL ESTATES AS A PLANNING TOOL: RECENT EXPERIENCE IN RIO DE JAN	82V/2921
PLANNING TOOL: RECENT EXPERIENCE IN RIO DE JANIERO AND MINAS GERAIS ST	82V/2921
RIO DE JANIERO AND MINAS GERAIS STATES, BRAZIL.= INDUSTRIAL ESTATES AS	82V/2921
MINAS GERAIS STATES, BRAZIL.= INDUSTRIAL ESTATES AS A PLANNING TOOL: R	82V/2921
BRAZIL.= INDUSTRIAL ESTATES AS A PLANNING TOOL: RECENT EXPERIENCE IN R	82V/2921

The keywords are reordered in the same way, and every keyword will be indexed and followed by the other keywords for the abstract within the room available on one line. The context of adjacent keywords will narrow search to relevant articles, e.g. by identifying the relevant geographical area. In this connection it should be noted that virtually all the geographical names in the abstracts have been indexed, however obscure they may be. Subdivisions of countries (e.g. states in the USA, counties in England) have been indexed. Northern and Southern and similar adjectives have been indexed where they are part of a proper name, e.g. Northeastern Thailand but not north Bangaladesh. Considerable care has been exercised in indexing common elements such as economic relations, planning, development and so on, but these terms are indexed where they are a critical element in the title of the abstract.

Where the first 20 letters (including spaces) of an entry are the same as those of the line above, they are omitted from the index, allowing the eye to move to the remainder of the line. For example:

AGRICULTURAL DEVELOPMENT PROSPECTS UNTIL THE YEAR 2000.=	82V/1813
POSSIBILITIES.= LAND RESOURCES OF	82V/1842
IN MEERUT CITY REGION.=	82V/1867
AND SOCIAL TRANSFORMATION: A STUDY IN	82V/2391
THE GREEN REVOLUTION IN NIGERIA: PROS AND C	82V/2886

The AUTHOR INDEX needs little further comment. It is a simple alphabetical listing of all the authors with some additional information to speed search for particular articles. Thus the author's name is followed by the date of publication and the first 30 characters of the title. This is printed in the original language but in some cases only the English translation of the title is given - notably with Russian, Chinese and Japanese articles.

Articles written by more than one author have the other authors listed as far as space allows, and then the later authors are listed separately followed by (2), (3) etc., signifying their place in the sequence. In a few cases the original abstract does not list all these authors and for these the first author only is listed, followed by 'and others'. Cross references are generally given for authors with prefixes, e.g. Van Andel will be found under both V and A.

ZIMBABWE.=PROGRESS REPORT: THE FIRST BOUGUER ANOMALY MAP OF	84P/0767
ZIRCON AGES FROM MOUNT SHERIDAN GABBRO, WICHITA MOUNTAINS.= U/PB	84P/0005
ZIRCON AGES OF ARCHAEAN TONALITIC GNEISSES FROM THE JOHANNESBURG-PRETO	84P/0017
ZIRCON DEFINES A BURIAL DEPTH OF 4 TO 7 KM FOR LOWERMOST UPPER DEVONIA	84P/0274
ZIRCON GEOCHRONOLOGY OF THE KAPUSKASING STRUCTURAL ZONE AND VICINITY I	84P/0269
ZIRCON, AND NATURE OF THE GRANITE SOURCE REGION (USA).=A GARNET- TWO	84P/2497
ZIRCON-AGE MIGMATITE GRANITE CRUSTAL-GROWTH WESTERN-AUSTRALIA= ARCHAEA	84P/2145
ZIRCON.=TECHNIQUE OF FISSION TRACK PATTING OF	84P/2288
ZIRCONS (AFRICA).= FISSION TRACK DATING OF KIMBERLITIC	84P/0702
ZIRCONS AGE-OF-THE-PROTOLITHS-OF-ORTHOGNEISSES INITIAL-87SR/86SR RB/SR	84P/1214
ZIRCONS OF LA BORIE, HAUT-ALLIER, FRANCE, AND CONSEQUENCES ON PRE-VARI	84P/0012
ZIRCONS.=ION MICROPROBE IDENTIFICATION OF 4100-4200 MYR-OLD TERRESTRIA	84P/0293
ZODIAC FAN, ALEUTIAN ABYSSAL PLAIN, NORTHEAST PACIFIC.= TECTONIC AND G	84P/2052
ZONED ERUPTION OF 1912 IN THE VALLEY OF TEN THOUSAND SMOKES, KATMAI NA	84P/1674
ZONED PLAGIOCLASE PORPHYROBLAST IN A MYLONITE (SCOTLAND).= GROWTH OF	84P/1538
ZUNI AREA, NEW MEXICO).=INTERPRETATION OF ELECTRICAL CONDUCTIVITY IN T	84P/0312
